Bottom, side view

Bottom w. Kickplate

Channel around perimeter for sidewalls

Bottom w. folded sidewalls

Fold-up sidewalls

Kickplate in Top

Heavy Duty Cardboard Packaging

Done !

Ready for strapping and shipping

This new and patented cardboard crating system has a range of key advantages over other packaging systems in the market:

- Can be produced cost effective in lower quantity runs
- Completely pre-assembled (use right off the shelf – no assembly time)
- Side-walls folded and stored in the crate (reduced storage space)
- Strong and very solid cardboard material
- Cushioning Spiral Feet, linked with nailed railings, reduce significantly vibration and make them easy forklift operable
- Already used in the aerospace industry in the US (suppliers to Northrop Grumman, GE Turbines)
- US Department of Defense (DoD) approval
